SUMMARY

Data Analyst with advanced hands-on experience in fintech, insurance, real estate, and e-commerce, skilled in BI dashboard development, ETL pipelines, and predictive modeling with tools like Power BI, Looker Studio, SQL, Python, and Apache Spark. Led automation and creation of 20+ KPI dashboards, optimizing stakeholder reporting and improving strategic planning by over 20%. Engineered data pipelines that reduced errors by 29% and developed fraud detection models that increased claim accuracy by 15%. Aiming to leverage strong analytical and technical expertise to deliver impactful data solutions and drive business results.

SKILLS

Languages: Python, SQL, R, Git/GitHub

Data Engineering: ETL Pipelines, Data Ingestion & Quality Control, Apache Spark, Pandas, NumPy, Web Scraping, Data Warehouse Design

BI & Visualization: Power BI, Tableau, Looker Studio, Looker, Excel (XLOOKUP, Pivot Tables, Charts), Google Analytics, Streamlit, Plotly

Machine Learning: Scikit-learn, NLP, Time-Series Forecasting (ARIMA, Prophet), Predictive Modeling, Classification, Feature Engineering, Statistical Modeling

Databases & Cloud: Microsoft SQL Server, PostgreSQL, MongoDB, Snowflake, Google BigQuery, Azure (Data Studio, Blob), Amazon RDS, Firebase

EDUCATION

Syracuse University, School of Information Studies

May 2026

Master of Science, Information Systems

Syracuse, NY

• **Coursework:** Applied Database Management, Business Analytics, Data Science

Thakur College of Engineering and Technology

May 2024

Bachelor of Engineering, Electronics and Telecommunication

Mumbai, India

• **Coursework:** DBMS, Management Information Systems, Big Data

EXPERIENCE

ISSA | Data Analyst Intern

Jun 2025 - Aug 2025

- Built and automated 20+ KPI dashboards in Looker Studio using Google Analytics data and Python (Pandas), delivering real-time performance tracking to 5+ senior stakeholders, including managers and a VP.
- Cleaned and structured datasets in Excel using XLOOKUP and advanced formulas, reducing data errors by 29% and cutting manual reporting time by 21%

Raj Reality | Data Analyst (Data Engineering & ETL)

Feb 2024 - Jul 2024

- Built interactive Power BI dashboards tracking property sales, lead conversion, and revenue KPIs, improving stakeholder engagement and strategic planning by 23%.
- Engineered ETL pipelines in SQL and Pandas to ingest, validate, and standardize fragmented sales data, feeding pricing models aligned with market demand and driving a 21% increase in sales

Pyramid Fintech Insurance Marketing LLP | Data Analyst

May 2022 - Jan 2024

- Analyzed 20,000 insurance claim records using Apache Spark and R to uncover fraud patterns, improving claim accuracy by 15%, and built a predictive risk-assessment model that supported underwriting decisions.
- Forecasted market demand using ARIMA time-series modeling and built interactive Tableau dashboards, improving campaign targeting by 18% and reducing policy processing time by 12%

PROJECTS

Syracuse Winter Operations Equity Pipeline

- Engineered an automated ELT pipeline Python, DuckDB, dbt ingesting live city snowplow and 311 data (5,017 segments, 654 complaints) daily, with 10 passing tests and a spatial-join dashboard surfacing neighborhood-level service disparities.

Job Market Intelligence Platform

- Built an NLP-powered platform in Python analyzing 20,000+ LinkedIn job postings to extract 50+ tech skills with 89% accuracy, and created a recommendation engine matching users against 10,000+ roles, reducing career planning time by 40%.

US Startup & VC Analytics Platform

- Built a full-stack analytics platform scraping SEC EDGAR, Y Combinator, ProductHunt, and GitHub data, training ML clustering and classification models on 10,000+ startups, and deploying an interactive Streamlit dashboard for startup discovery and VC trend analysis.
